

- PS 1 Students will explore one variable data. (Univariate data)
- PS 2 Students will explore two variable data. (Bivariate data)
- PS 3 Students will learn how to collect data: (surveys and experiments)
- PS 4 Students will explore probability, random variables, and probability distributions
- PS 5 Students will learn about Sampling Distributions
- PS 6 Students will learn inference for Categorical Data: Proportions
- PS 7 Students will learn inference for Quantitative Data: Means
- PS 8 Students will learn inference for Categorical Data: Chi- Square
- PS 9 Students will learn inference for Quantitative Data: Slopes

Releasing late May 2019 [AP Statistics, College Board](#)
